LECISOME

Lightweight Feel

Rapid Absorption*

High-Concentration Oil

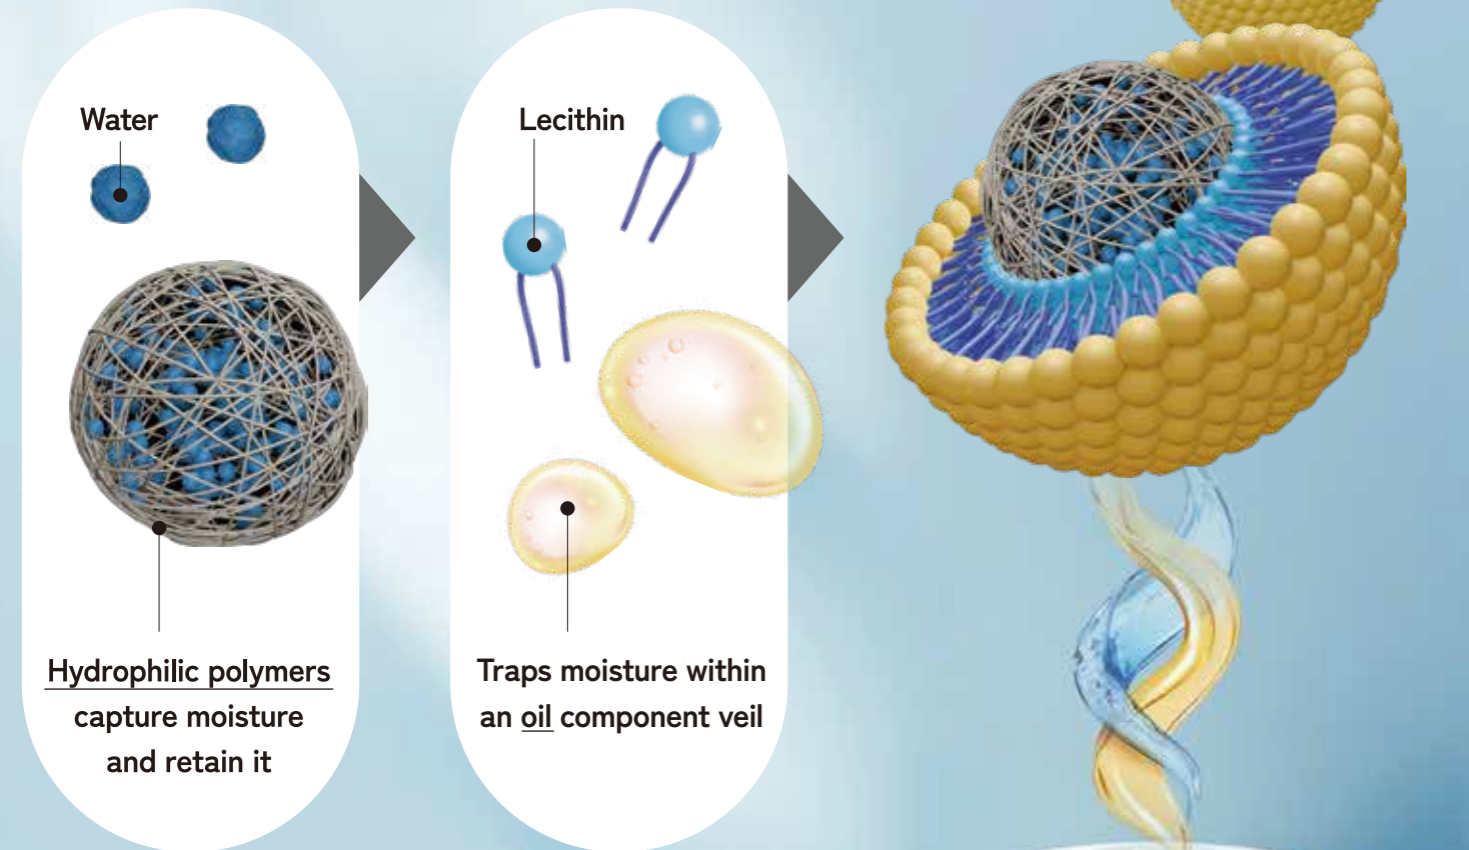

New Emulsification Technology Based on Skin Penetration Theory

*Up to the stratum corneum ○Image for illustrative purposes only.

LECISOME Lecithin+some

Lecithin traps moisture within oil components for emulsification

Achieves a “non-greasy” feel despite over 50% oil content

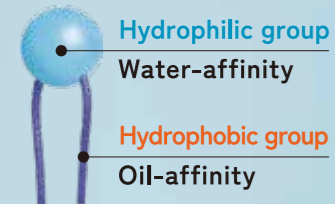

Hydrophilic polymers capture moisture and retain it

Traps moisture within an oil component veil

Lecithin

A natural surfactant that is a primary component of cell membranes and easily blends with skin.

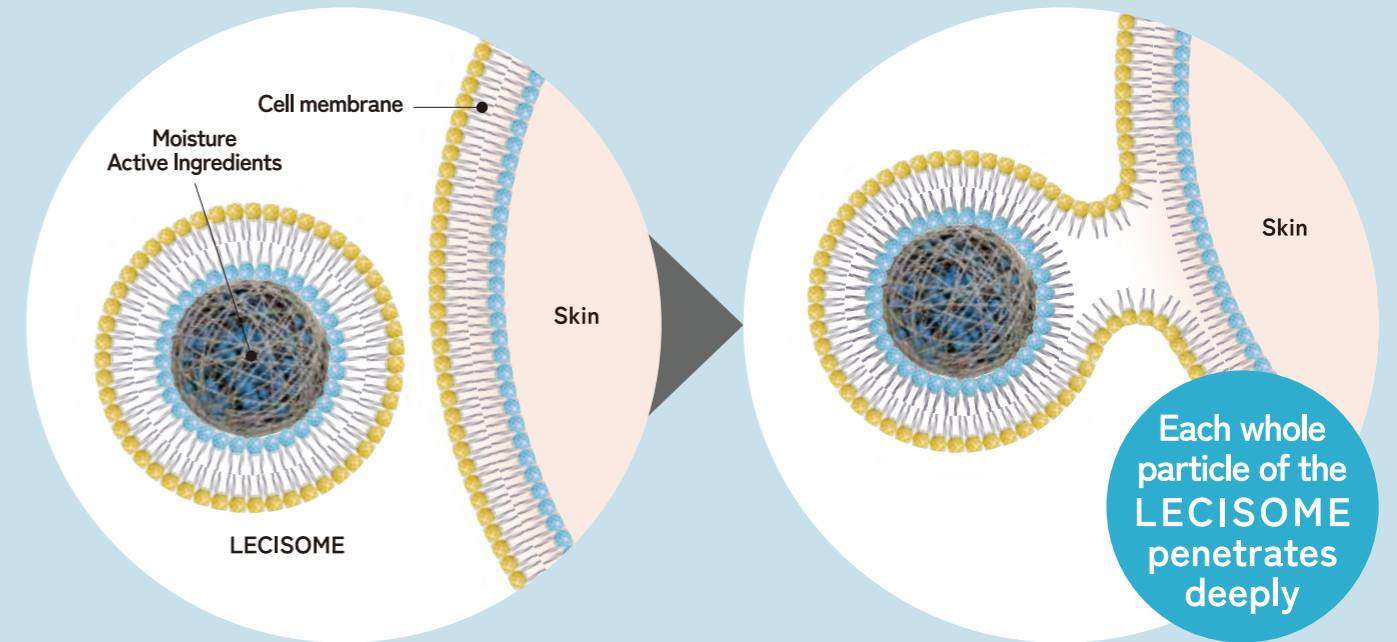

New W/W/O Structure

Water in Water-soluble polymer in Oil

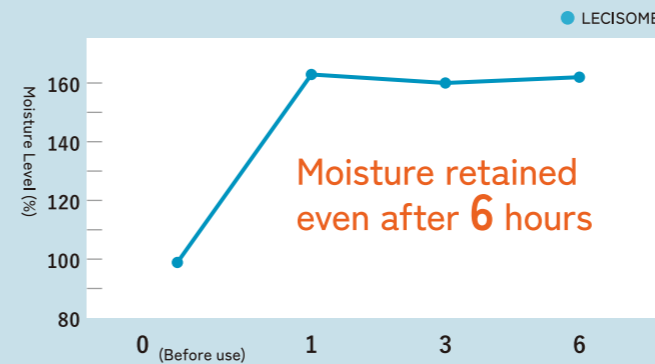

1 Easily absorbed by the skin

LECISOME, an emulsifier made from the same phospholipids found in cell membranes, makes it easily.

2 Superior Moisture Retention^{※2}

Skincare Moisture Level Changes

After application, skin moisture levels increase and remain elevated for over 6 hours. It demonstrated excellent moisture retention. Moisture is trapped by hydrophilic polymers, allowing it to remain within the skin for an extended period.

3 Smooth and spreads easily^{※2}

Comparison of Friction Coefficients

Its smooth texture and high penetrating power minimize resistance during application. Compared to reference products (typically W/O creams), it demonstrated approximately 3.2 times better spreadability.

4 Astonishing Penetration^{※1} Speed

Lecisome penetrates to the stratum corneum approximately 1.5 times* faster, allowing moisture and oils to penetrate.

※1 Up to the stratum corneum ※2 Compared to our products
*When applying the same amount of oil in different cream formulations to the skin, compared to O/W cream ○Image for illustrative purposes only.

Comparison of Skin Surface Luster

1

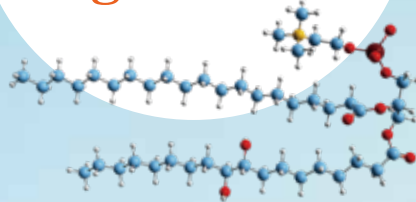

Rich in oil for
deep hydration

Formulated with over 50% oil content for moisturizing down to the stratum corneum.

2

Safe and gentle
with **natural ingredients**

Emulsified with lecithin.
No synthetic surfactants.

3

Applies incredibly
thinly

Hard to believe it's oil-rich!
A refreshingly light feel.

Ingredient customization / Diverse oil product offerings

Main Ingredient Oils

50%+ Blend

- ◎ Olive Oil
- ◎ Camellia Oil
- ◎ Petrolatum
- ◎ Jojoba Oil
- ◎ Squalane
- ◎ Almond oil

30-35% Blend Ability

- ◎ Shea Butter

Beauty Ingredients

Water-Soluble/Oil-Soluble Other Ingredients Blend Possible

- ◎ Niacinamide
- ◎ Vitamin C
- ◎ Retinol
- ◎ PDRN (Plant-Based/Animal-Based)
- ◎ Bakuchiol
- ◎ Azelaic Acid

Natural index of
“LECISOME” exceeds 90%

Applications for organic, natural,
and additive-free cosmetics

Also applicable to cream products
Body cream, hand cream, hair cream, etc.

Numerous orders fulfilled for
major cosmetics manufacturers

We accept OEM/ODM orders for “LECISOME”.
