

SUPPLEMENT PATCH

Supplement Patch with Medical Adhesive

Skin Patch for simply penetre ingredients

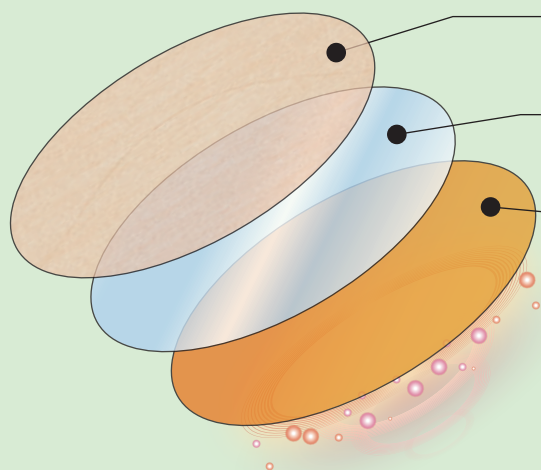

SUPPLEMENT PATCH

Supplement Patch for Ingredients to Penetrate the skin over 6 to 24 hrs

Patch anywhere
such as arms

Recommended to patch
for about 24 hours

1 Advanced penetration mechanism

Non-woven fabric

Less discomfort even when patch
for a long period of time

Film layer

Seals the skin surface to help penetration

Beauty ingredients and adhesive layer

Contains beauty ingredients and adhesive

The patch's beauty ingredients penetrate through a concentration gradient while the patch's sealing effect prevents moisture from evaporating, makes stratum corneum soften and swell, and diffuses the ingredients.

2 Conducted various tests

Tested for safety*

Cytotoxicity test

Human patch test

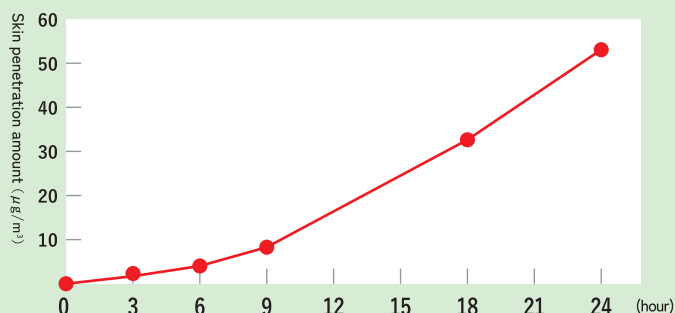

etc.

Selected adhesives used in the medical field
for over 20 years are used.

*This does not mean that skin irritation will not occur in all people.

3 Highly penetrable and long-lasting

Tocopherol acetate's skin penetration test

The beauty ingredients slowly penetrate and diffuse into
the stratum corneum over approximately 6 to 24 hours.

Customization with water-soluble ingredients is available.

Oil-soluble substances can also be added in small amounts.

Examples

- Caffeine
- Vitamin C
- Calcium
- Female hormone
- DHA/DPA
- Amino Acid
- Curcuma Longa (Turmeric)

Simply peel and stick the patch on the skin! Easy to use!
